Sample Response

```
[
  "bavfau.gq"
]
```

Create Email ID

URL

https://yourdomain.com/api/create?key=[yourkey]&email=[id]&domain=[yourdomain]

Parameters

Key	Value
key	Key which you may have set in your Admin Panel of TMail Installation.
email	Email keyword that you want to create. For example, if you want to create **something**@google.com then send **something** as a value. Its optional. If nothing is passed then a random keyword is generated.
domain	Domain which you receive from above API call. You need to pass any one of the domain name received in previous call. If nothing is provided then app will randomly assign any domain name.

Sample Response

harshit@bavfau.ga
